1. At the 7 August 1979 TKMWG meeting, I made the point that SECOM could not support approval of the suggested [redacted] support to NATO until, at least, the results of the impending NDPC security survey are reviewed. The

2. Additionally, I do not believe it proper to send this paper to the DCI for approval and issuance of such guidelines when he still has pending - for consideration by the NFIB - the APEX imagery threshold criteria and the COMIREX Sensitive Parameters paper. I suggest the

3. I must confess that I am boggled by the paragraph 35.b flip-flop of unclassified if handled one way and Confidential if treated otherwise and cannot endorse that section as proper classification. However, I understand there is agreement that this matter needs resolution. I suggest that such correction is required before this paper is forwarded. [redacted]

5. I also believe, as we discussed at the 7 August meeting, that a less specific statement on Emergency Dissemination Authorization, such as was developed for the APEX Manual, might be used rather than the current paragraph 38. That language rules out the DEFCON, etc. references which tests, we understand, have never been met in any previous instance of emergency dissemination. A copy of the APEX section dealing with this subject is attached. [redacted]
